

Progress report

2024/10/28 Karter Wong A2177802

Progress:

- Started to learn the basics of Python
- Translated and studied Taiga Mitsumori senpai's research on "Incremental forming of CFRTP under hot water conditions using an oil bath and CAM system creation using Python language"
 - Started to try to understand the python code for the CAM system from the research Taiga Mitsumori senpai's research.

Plan:

- Continue to study and take notes of Taiga Mitsumori senpai's research on "Incremental forming of CFRTP under hot water conditions using an oil bath and CAM system creation using Python language"
- Understand the python code for the CAM systems
 - Use ChatGPT to explain the code
 - Look for ways to improve the CAM system's efficiency and
 - Research ways to do incremental forming on free form surfaces
